SUMMARY

Full-stack developer with 7+ years of experience building AI products, healthcare software and cloud-native systems. Currently building AI MVPs and scalable products for startups and enterprises at BuildFound. Previously led a team delivering telehealth and EHR-integrated platforms. Hands-on with LLM apps, RAG pipelines and voice agents, from prototype to production, across React/Next.js, Node.js, Python and Go on AWS and Azure.

SKILLS

Languages	TypeScript, JavaScript, Python, Go, SQL
Frontend & Mobile	React, Next.js, Angular, React Native, Expo, Tauri, Tailwind CSS, WebRTC
Backend	Node.js, Express, Hono, tRPC, FastAPI, REST, Socket.io, OAuth 2.0, Azure B2C, Serverless
AI / GenAI	OpenAI, Gemini, Vercel AI SDK, RAG, embeddings & vector search, voice agents, LLM evaluation
Data	PostgreSQL, MongoDB, MySQL, SQLite, Redis
Cloud & DevOps	AWS (Lambda), Microsoft Azure, GCP, Cloudflare, Docker, CI/CD, Linux
Healthcare & Pay	EHR (DoseSpot), eRx, eFax, HIPAA/GDPR · Stripe, PayPal, NMI, Authorize.net, Recurly

EXPERIENCE

BuildFound (Fddigital) — *Full Stack Developer* — Sep 2025 – Present · Remote

- Build AI MVPs and scalable AI products for startups and enterprises, taking LLM features from prototype to production.

BexCode Services (Dcode Health) — *Full Stack Developer · Team Lead* — Feb 2023 – Sep 2025 · Remote

- Led a cross-functional team delivering telehealth and healthcare platforms end to end, including real-time features, AI and complex EHR workflows.
- Implemented AI-generated consult notes from patient–provider conversations, cutting manual clinical documentation.
- Built full-stack apps in Next.js, Angular, React and React Native on Node.js services backed by MongoDB, PostgreSQL and Redis.
- Integrated the DoseSpot EHR API, eRx, eFax and OAuth 2.0 for compliant, secure healthcare operations.
- Shipped subscription and per-use billing across Stripe, PayPal, NMI, Authorize.net and Recurly.
- Built real-time chat, scheduling, insurance and dynamic questionnaire systems; automated reminders and background jobs with cron and AWS Lambda.

Tata Consultancy Services — *Assistant System Engineer* — Feb 2020 – Nov 2022 · Bangalore

- Developed and maintained Node.js/Express back-end services and MongoDB-based enterprise services for high-throughput systems.
- Added real-time notifications and activity streams over WebSockets (Socket.io).
- Administered Microsoft Azure Active Directory (Exchange, licensing, group policies) and Linux accounts with role-based access.
- Automated backups, reports and queue-based jobs with cron and scheduler workflows, reducing manual intervention.

Real Time Consultancy Services — *Software Developer* — Jul 2019 – Feb 2020 · Suri, WB

- Built college management software (enrollment, faculty, schedules, exams) with Laravel, Lumen, React and MySQL.
- Built a sand-transport challan system with QR validation and OTP auth, and a job portal on Node.js and MongoDB; used Redis for queues and sessions.

SELECTED PROJECTS

Byre — local database manager Desktop · macOS, Windows, Linux

Menu-bar app that runs PostgreSQL, MySQL, MariaDB, MongoDB, Redis and Valkey side by side, each with its own version, data folder and port, plus a built-in Studio to browse, query and edit data. Includes backup/restore, upgrades, auto-updates and a CLI that AI agents can drive.

Hirelytics — AI hiring platform React, Node.js, WebRTC, OpenAI, PostgreSQL

Recruiter and candidate workflows with real-time AI voice interviews, attention monitoring, and automated scoring of technical, communication and problem-solving skills with generated feedback.

CourseSupportBot — advanced RAG support bot Go, SQLite, OpenAI, Docker

Answers questions over video-course subtitles, citing the exact lecture and timestamp. Ships as a single static Go binary with an embedded web UI, SQLite storage and no vector-DB server.

Talkthru — mental-health AI companion OpenAI, Gemini, Vector DB, Next.js

RAG chatbot on GPT-4o and Gemini with emotion detection, semantic memory, CBT-based journaling, and crisis detection and escalation. Built with a privacy-first, HIPAA/GDPR-aware design.

Healthvio — telehealth platform Next.js, Node.js, Agora

Booking, dynamic intake questionnaires, EHR workflows, Agora video consults, and two-way Google Calendar and Outlook sync.

ccslot — npm CLI for Claude Code Node.js, TypeScript

Zero-dependency CLI that runs multiple Claude Code accounts on one machine, each with separate credentials, while sharing projects, skills and settings between them.

EDUCATION

SRM University Sikkim — Master of Computer Applications (AI, ML & Data Science) Jul 2025 – Present

Triveni Devi Bhalotia College, Raniganj — Bachelor of Computer Science 2016 – 2019

PUBLICATION

Operating System: A Case Study — International Journal of Trend in Scientific Research and Development (IJTSRD), Vol. 2, Issue 3, Paper ID 10780 Apr 2018
